Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gaebel et al. (US 4,795,951). Gaebel teaches a device for connecting an electric motor (Fig.3) comprising two electrical conductors (terminals 11 and 12) leading to the motor; and a suppressor arranged between the conductors including a capacitor C1/C2 and a varistor V1 connected in parallel.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gaebel in view of Crook et al. (US 5,473,212). Gaebel does not teach a disk-type varistor, per se.

Crook teaches a varistor disk assembly for spark and EMI suppression in commutators (c.1, lines 20-27).

It would have been obvious to one having ordinary skill in the art to use a varistor disk per Crook for the varistor of Gaebel since varistor disks are desirable for suppression of electro-magnetic interference.

6. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gaebel in view of Moy (US 4,819,130). Gaebel does not teach details of a casing.

Moy teaches an r.f. suppression device for a fuel pump motor 36 (Fig.6) including capacitor 26 having a synthetic polymeric resin (fuel resistant) casing 32 which integrally encapsulates the device and enables the device to be mounted by means of socket end 34. The device may be adapted to mount upon the terminals of the motor (c.3, lines 9-14).

It would have been desirable to one having ordinary skill in the art to modify Gaebel and encapsulate the suppressor in a casing per Moy since this would have been desirable to provide for mounting of the device in an application such as a fuel pump motor.

Regarding claim 5, note inductors L1 and L2 connected to the respective conductors 11 and 12 in Gaebel.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Burton S. Mullins whose telephone number is 305-7063. The examiner can normally be reached on Monday-Friday, 9 am to 5 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on 308-1371. The fax phone numbers for the organization where this application or proceeding is assigned are 305-1341 for regular communications and 305-1341 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-0956.
